PROFESSIONAL EXPERIENCE

E-commerce Project Manager

MiraiLit Limited, Dhaka | December 2022 - Present

- Lead end-to-end e-commerce operations covering order management, fulfillment, logistics, inventory, customer service, product content, and website operations.
- Lead and mentor the operations team, establish operational KPIs, monitor performance, and coordinate day-to-day activities.
- Develop and maintain written and video Standard Operating Procedures (SOPs) for the operations team to standardize processes, support employee training, and improve operational consistency.
- Document operational processes and workflows to help team members follow standardized procedures and execute recurring tasks efficiently.
- Coordinate with marketing, technology, finance, product, customer service, logistics, and operations teams to support business objectives and smooth order fulfillment.
- Monitor e-commerce operations to identify bottlenecks, operational issues, delays, and opportunities for process improvement.
- Coordinate resolution of operational and technical issues across relevant teams to maintain smooth online operations.
- Manage relationships with logistics providers and suppliers to support reliable order fulfillment and timely delivery.
- Monitor website operations and coordinate with development teams to troubleshoot and resolve technical issues affecting customers and operations.
- Oversee operational requirements for new product launches, promotions, campaigns, and sales events.
- Evaluate and implement tools, integrations, and software solutions to automate processes and scale e-commerce operations.
- Use operational and website data to monitor performance and support data-driven decision-making.
- Oversee coordination between customer service, inventory, logistics, content, and web development functions throughout the online customer journey.

E-commerce Operations Executive

MiraiLit Limited, Dhaka | September 2021 - December 2022

- Managed daily online order processing, fulfillment, shipping, and returns to support accurate and timely order delivery.
- Coordinated with logistics teams to monitor inventory, order dispatches, and delivery activities.
- Monitored stock levels and coordinated with suppliers for procurement and restocking.

- Maintained online product listings, including product pricing, descriptions, and stock availability.
- Coordinated with customer service to resolve order-related issues and customer concerns.
- Analyzed operational data, including orders, returns, and delivery times, to identify opportunities for process improvement.
- Assisted with vendor and seller onboarding and coordinated operational requirements for smooth integration.
- Worked with the finance team to reconcile invoices, COD payments, and inventory reports.
- Supported marketing campaigns and promotional activities by coordinating operational requirements.
